

Discovery Interview – Admin & User Q&A;

Admin – Q&A; (2)

Person: How will user accounts be managed in the system?

Me: All user accounts will be managed from one dashboard where accounts can be approved, blocked, or removed if needed.

Person: What kind of control will the admin have over users?

Me: The admin will be able to view all users, see their status, approve pending accounts, and manage system security.

User – Q&A; (3)

Person: What information do users need to create an account?

Me: Users will enter their name, email or phone number, password, date of birth, and upload their QC front and back ID for verification.

Person: What type of workout information can users track?

Me: Users can track exercises, sets, reps, weight, body weight, and their workout history.

Person: What makes the system easy to use for users?

Me: The system will have simple navigation, quick data entry, clear progress tracking, and will work on both mobile and computer.
